AI-Based Optimisation of Incentive Schemes for Sustainable Mobility

www.aicentive.eu

Dear AI-CENTIVE Community,

Welcome to our third AI-CENTIVE newsletter, where we embark on a journey of innovation and collaboration in technology and mobility.

Dive with us in the latest developments, don't miss out any upcoming events, and get more information about project partners contributing to more sustainable mobility in the future.

Inform your network about the project and become a part of a community that sees a great potential in deep learning models for a greener mobility.

News & Events

First project year is officially over. Check our achievements

The AI-CENTIVE project has marked significant progress in its first year. The following list is just a short summary of relevant contributions, the project partners delivered since the AI-CENTIVE start.
MODUL Technology, webLyzard technology, Geosphere Austria, ummadum, and BOKU University play a vital role in shaping the future of sustainable mobility and this collaborative effort aims to incentivize greener transport means. All of this with the help of AI and data-driven approaches. DIO has an honour to communicate about the progress and disseminate information about the project.

Data Intelligence Offensive (DIO)

Data Intelligence Offensive (DIO) is an association that serves as a cooperation platform for various European stakeholders who contribute to the efficient development of the data economy.
It comprises a community of data enthusiasts and enablers who see a transparent, open, interoperable and sovereign data economy as an opportunity for a more efficient and sustainable future for the economy.
DIO promotes the Austrian data economy in order to take on an international pioneering role in the intelligent use of data. DIO creates a secure ecosystem with decentralized data spaces to promote data-driven innovation, sustainable value creation and prosperity.

When Experts Exchange:
AI-CENTIVE Stakeholder Advisory
Board Meeting

AI-CENTIVE Stakeholder Advisory Board:
Who are our advisor?

The first meeting of AI-CENTIVE partners and the Stakeholder Advisory Board (SAB) took place on October 10, 2023, and gave participants space for an insightful thought exchange. Both project partners and SAB members could take a fresh look at the current results, running processes, and think about implementing new ideas into the future steps. That's essential for a more objective and productive progress of the project.

Event tipps

Spezialtag AI ACT

31. January 2024
The AI Act is a proposal by the EU Commission for a regulation on the regulation of artificial intelligence. It follows a risk-based approach that divides AI applications into different categories depending on their potential for harm. It is intended to promote trust in AI and at the same time protect the fundamental rights and values of the EU.
This special day will inform you about the latest developments and provide you with practical implementation options for your company's success

Mobility Impact Forum

5. March 2024
The place of trust between the public and innovative actors, Impact Mobility Forum is coming on the 5th of March 2024.
A panel of solution providers to move towards a more inclusive, intelligent and sustainable mobility.
A vast space will be dedicated to allowing you to connect with more than 750 decision makers online and offline.
Gathering more than 1,000 private and public sector decision-makers. With 20 mobility challenges, 80 speakers, and 250 cities represented.
A single objective unite us: to develop awareness on sustainable issues

15th Austrian Cycling Summit 2024
16. - 17. April 2024
Stakeholders, planners, decision-makers and anyone interested in cycling can look forward to numerous specialist presentations and activities. The focus will be on "*Cycling in everyday life*".
The annual cycling conference serves to exchange current research results and developments, to network and to share experiences. Stakeholders, planners, decision-makers and anyone with a general interest in cycling are invited to attend. The event will be accompanied by an expo where specialist exhibitors can present their products and services. All cycling instructors and master trainers are also

through the sharing of insights and good practices, relating to leadership, monitoring and training.

invited, and newly certified ones will receive their awards during the event.
