

AI-CENTIVE

Optimization of Incentive Schemes for Sustainable Mobility in Austria

AI-CENTIVE is...

... a project combining partners from different domains, working on AI-based optimization of incentive schemes for sustainable mobility in Austria.

The main GOAL is...

... to bound expertise and data from different domains to support and incentivize sustainable transportation options and reduce carbon emissions from the use of private cars on the daily basis.

The ADDED values are...

... greener choices of transportation means based on data and AI predictions,
... visualisation of data incentivising sustainable transportation means,
... use of AI and data ecosystems as future-oriented tools contributing to sustainable mobility solutions.
