

## AI-Based Optimisation of Incentive Schemes for Sustainable Mobility

[www.aicentive.eu](http://www.aicentive.eu)

### Dear AI-CENTIVE Community!

Welcome to our fourth AI-CENTIVE newsletter, in which we embark on a journey of innovation and collaboration in the fields of technology and mobility.

Dive into the latest developments with us, don't miss any of the upcoming events and learn more about project partners who are contributing to a more sustainable mobility in the future.

Inform your network about the project and become part of a community that sees great potential in deep learning models for greener mobility.

News & Events

### Our Kick-Off: the Webinar

The **AI-CENTIVE webinar** on April 4, 2024 served as a valuable platform to explore future mobility trends, with Dr Lyndon Nixon (CTO, MODUL Technology) and the Managing Director of webLyzard technology, Prof. Arno Scharl at the helm. They presented the AI-CENTIVE Mobility Dashboard, which represents a significant leap forward in mobility analytics and AI application. This session not only showed the way forward, but also invited attendees to actively shape the story of mobility. Learn more about this exchange and how it went.

## Event tips

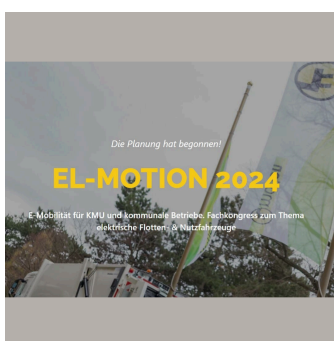

### Klima Biennale Vienna

**April 5 - July 14**

Embark on a transformative journey at the inaugural Klima Biennale Wien, that has just begun. This festival, motivated by the urgent need for a radical cultural shift in response to the climate crisis, will weave through Vienna until July 14th. Over a hundred days, a multidisciplinary, interactive, and accessible program will unfold across the city, aiming to foster collective solutions and innovative ideas for a sustainable future. Hosted by the KunstHausWien, the heart of this event invites you to engage, imagine, and inspire.
